The Pirate Care Project

pirate.care

- **Pirate Care is a transnational research project and a network of activists, scholars and practitioners who stand against the criminalization of solidarity & for a common care infrastructure.**
- **Neoliberal policies have for the last two decades re-organised the basic care provisions that were previously considered cornerstones of democratic life, turning them into tools for surveilling, excluding and punishing the most vulnerable. The name Pirate Care refers to those initiatives that have emerged in opposition to such political climate by self-organising technologically-enabled care & solidarity networks.**

Pirate Care

My project as digital pirate care

- Built on minimal computing principles using HTML and
to-be-found map-making language
 - Housed on flash drives and open access

My project as digital pirate care

- Built on minimal computing principles using HTML and to-be-found map-making language
 - Housed on flash drives and open access
- Provide something outside of popular platform visibility
 - Not exposed to big data uptake

My project as digital pirate care

- Built on minimal computing principles using HTML and to-be-found map-making language
 - Housed on flash drives and open access
- Provide something outside of popular platform visibility
 - Not exposed to big data uptake
- Local focus and dispersal of information
 - A vehicle for sharing community sites of care, resources, and action/possibilities for action
